

# Report Analytics

Do you use ASG Mobius DocuAnalyzer? Rely on DocuAnalyzer for data mining and analytics on documents contained in the ASG Mobius ViewDirect archiving and storage system?

DocuAnalyzer is a private label version of Datawatch's Monarch, the world's most widely used report mining and report analytics solution. You may have been notified that ASG will no longer be selling DocuAnalyzer. Following expiration of your current maintenance contract, ASG will no longer be an authorized support provider and will not be entitled to provide you with updates from Datawatch.

Participate in this special upgrade program and reap the benefits of Monarch technology!

## Monarch Professional (v 11) – New Features

All DocuAnalyzer customers are on an earlier version of Monarch. The current release of Monarch Professional – version 11 – has many new features and capabilities, as well as a modern look and feel. In addition, most DocuAnalyzer customers are on the Standard version of Monarch, which was discontinued earlier this year. The Professional version of Monarch is much more feature rich, and includes more robust capabilities, including the ability to model PDF documents.

Datawatch is offering the Professional version of Monarch v11 to all DocuAnalyzer customers at a **special, limited time upgrade price**.

And best of all – the models and reports you created in DocuAnalyzer are fully compatible with Monarch Professional v11! No need to re-create your models or re-write your reports.

Monarch Professional, version v11, which was released in July 2011, includes the following new features:

- A brand new look and feel, including ribbons, the ability to view multiple charts in a grid
- Quick and intuitive data analysis features, including filtering, sorting, aggregation and drilling
- Support for 64-bit platforms and availability on Windows 7
- The latest technology for report mining, document mining and report analytics.

## Special Upgrade Program for DocuAnalyzer Customers

ASG no longer resells DocuAnalyzer – the private label version of Datawatch's Monarch solution. Don't lose one of the most powerful tools in your data discovery and business intelligence efforts. By upgrading from DocuAnalyzer to Monarch, you will continue uninterrupted authorized support of, and official maintenance updates to, Datawatch's Monarch technology following the expiration of your current maintenance contract with ASG while upgrading your experience with the latest version of Monarch.

Upgrade from DocuAnalyzer to Monarch today and get:

- An upgrade to Monarch Professional (v11) and conversion rights
- A special one-day free "health check" of DocuAnalyzer models and reports by Datawatch certified professionals from Datawatch's Report Analytics Center of Excellence
- Special discounts, starting at 50%, on Monarch Report Mining Server (RMS) and Monarch Report Manager on Demand (RMOD), offering web-enabled data mining and analytics on documents stored in ASG Mobius ViewDirect.

Take advantage of Datawatch's special DocuAnalyzer upgrade program and upgrade to Monarch today.

## Monarch Report Mining Server – Web-Enabled Data Mining for ASG Mobius ViewDirect

For DocuAnalyzer customers that need a Web-enabled report mining solution, Monarch Report Mining Server (RMS) is the most advanced solution for web-enabled data mining and analytics on documents stored in ASG Mobius ViewDirect. Monarch RMS brings business intelligence attributes to static reports and documents stored in traditional COLD report archives and enterprise content management systems. Monarch RMS lets you filter, sort, reorder and analyze these previously “unusable” documents. With RMS you get:

- Integration with ASG Mobius ViewDirect
- Eliminate client installations
- Leverage security & administration of ASG Mobius ViewDirect
- Transformation of static reports – such as invoices, billing statements, PDFs and more – into Excel, HTML, CSV files with one click and no programming
- Web-based document and report mining and analysis of text-based reports stored in any document management system

## Monarch Report Manager on Demand (RMOD)

For DocuAnalyzer customers that need more enterprise scale report archive capabilities, Monarch Report Manager on Demand (RMOD) is used worldwide for high-volume enterprise electronic capture, management, archiving and retrieval of reports, statements, invoices and other business documents. Monarch RMOD is a tested, high-performance solution that manages billions of documents from the point of initiation through delivery. Monarch RMOD gives you:

- Enterprise scalability
- The world's only end-to-end archive & analytics solution (when paired with RMS)
- A proven solution for preserving vital business and legal data in a variety of formats, including traditional magnetic WORM media, and optical and magneto-optical devices such as EMC Centera, Compliance Edition, and more.

## About Datawatch Corporation

Datawatch Corporation (NASDAQ-CM: DWCH) empowers organizations to transform the massive amounts of information that is trapped in static reports, PDF files, text files and other content-rich, but difficult-to-use data sources, into a dynamic information analytics system that accelerates and improves decision-making throughout their operations. Datawatch's technology allows its tens of thousands of customers worldwide to leverage the investments they have made in reports from ERP, CRM and other custom applications into high performance analytic information at a fraction of the cost and time of traditional approaches. Datawatch is headquartered in Chelmsford, Massachusetts with offices in London, Sydney and Manila, with partners and customers in more than 100 countries worldwide.
