

Monarch Data Pump Learning Outcomes

Following are the performance objectives for participants in this training class. After successfully completing this class, participants will have knowledge of the following topics:

Distribution Building

- Report archiving strategies
- Exporting to various formats
- Exporting to FTP and Sharepoint directories
- Exporting to a database
- Automatic attachment of exported data to pre-determined email addresses, including zipping and password-protection of those outputs
- Archiving and maintenance of outputs
- Scripting (shown by example only; scripting training in VB.Net is beyond the scope of the course)

Scheduling

- Setting up a schedule (daily, weekly, monthly, etc.) for the processing of reports, including setting retries (if reports are missing during the first run through) and configuring maintenance
- Setting up monitoring as an alternative to scheduling (a monitoring process looks for files to appear in a designated directory and processes them right away)
- Running processes manually for testing

Logs and Alerts

- Setting up alerts-and emails-for failure conditions
- Examination of the uses of the log files
- Maintenance of logs
