

BETTER AND FASTER DATA PREPARATION FOR IBM WATSON ANALYTICS AND IBM COGNOS ANALYTICS

Being able to collect the right data, quickly, easily and with flexibility is the key to making better decisions, faster. That's why Datawatch Monarch is the world's most widely deployed self-service data preparation tool.

RADICALLY SIMPLE TO USE

Drop a file or document on the prep canvas and the data is instantly available in rows and columns. Over 80 pre-built functions. No scripting necessary.

AUTOMATIC DATA EXTRACTION

A Monarch exclusive. Drag-and-drop data extraction. Finally access information from PDFs, log files, JSON, text files, etc. with just one click.

DATA EXTRACTION FROM WEB PAGE

Simply copy and paste a Web page and see immediate extraction of data.

UNDERSTAND DATA QUICKLY

Filters help you prepare data while larger data sets load in the background.

WIDE INTEGRATION

Connect to all major databases like Hadoop, NoSQL, Salesforce, Access, Impala.

TRANSPARENT PREPARATION

Each change is recorded and visible to show how it was prepared. Redo and undo steps.

SHARING AND AUTOMATION

Save data prep as a Workspace and share with others.

JOIN DATA SETS

Join Analysis lets you integrate disparate data using powerful algorithms.

ONE-CLICK DATA CONSOLIDATION

With a single click, consolidate sets with identical structures, such as daily or monthly reports.

DIRECT EXPORT INTO IBM WATSON ANALYTICS AND IBM COGNOS ANALYTICS

Monarch prepares an optimized data file for direct import into these powerful data discovery services.
