

Modell's Ups its Game with Self-Service Data Prep

BACKGROUND

America's oldest, family-owned and operated retailer of sporting goods, athletic footwear, active apparel and fan gear

Chain of over 150 stores

CHALLENGE

SOLUTION

- Difficulty getting data from the mainstream system into a workable format
- Multiple data formats resulted in slow and painful reformatting process to extract useful insights
- Printed reports contained data that was then re-keyed into spreadsheets

Multiple departments all rely on the Monarch system to pull financial reports, accounts payable check registers, and various merchandise inventory reports.

RESULTS

Elimination of data re-keying with sources streamlined to provide timely information for improved business operation across 150 stores

Individual store P&Ls are created monthly

No programming required

Ease of use allows for fast and efficient data retrieval and reporting

“ If I didn't have Monarch, I wouldn't be able to get to the data or meld all my data sources together to help us improve operations. It's a great tool and invaluable for getting my job done every day. ”

Joe Paltenstein, AVP, Assistant Controller, Modell's Sporting Goods
